

Participle constructions – Flipped Classroom

You are going to watch some introductory videos on our new grammar topic, i.e. participle constructions. Basically, there are three forms of participle constructions, namely **present, past and perfect participles**.

You know the participles from forming tenses, thus they are not new. What is new, though, is that you can – from this day onward – use them to **shorten or combine sentences**. Having mastered that grammar topic proves that you are B2 students ;) Are you excited?

Make yourselves comfortable, lean back and start by watching the first video, which is simply an overview of what you should already know:

Forming participles (revision year one – just to be sure):	https://www.youtube.com/watch?v=3Fzk-ewXw0 (watch the first 3:45 min.)
BBC Masterclass (veeeeeery funny^^): *main clause = Hauptsatz (bestehend aus mind. Subjekt + Prädikat) *subordinate clause = Nebensatz, untergeordnet	https://www.youtube.com/watch?v=H8E5EF0IEN0 While watching this video, complete the gaps and note down the examples used by funny Dan: A participle is <u>a verb form used as an adjective or to form participle clauses</u> . A participle clause is <u>a subordinate clause</u> connected to <u>a main clause</u> . Example for PRESENT participle: Stepping on camera I relaxed completely Example for PAST participle: Filmed inside the footage was too dark to use. Participle clauses usually mimic <u>tenses</u> , which means that the different participle forms do not <u>show tense directly</u> . The subject of both the participle and the main clause are <u>the same</u> , therefore we don't need the subject in the participle clause and can <u>leave it out</u> it. Example for subjects: Seeing the mistake, she corrected it immediately

Participle constructions – Flipped Classroom

	In order to make a participle clause negative, we use “not” <u>before the participle.</u> (where?). Example for not: Knowing not to call, she waited until the next day. 2nd example for not with a different meaning: Not knowing the baby slept, she phoned. We use “having + past participle”, i.e. the perfect participle, if we want to express that <u>one action happened before another action.</u> Example for PERFECT participle: Having put away the equipment they went home. We can use a number of prepositions such as <u>after, before, when, while</u> to clarify events order, time, cause, and effect. 2 examples: By practicing every day, she passed her driving test. Without knowing it, I had ruined everything.
Participle clauses instead of relative clauses (great pronunciation & typos):	https://www.youtube.com/watch?v=4XSCditAU_A While listening to this student, have a look at the screenshot of his examples below and try to figure out the reason why the PRESENT participle is used in the first two example sentences, while the PAST participle is used in the third one. Then finish the sentence: Participle clauses can be used instead of relative clauses. If a relative clause is <u>active</u>, we use the present participle. However, if the form of the verb in the relative clause is <u>passive</u>, we need the past participle.

Participle constructions – Flipped Classroom

	Relative clauses	Participle clauses
1	One morning I saw a man <u>who walked</u> along the river.	One morning I saw a man <u>walking</u> along the river.
2	The person <u>who was walking</u> next to me looked really tired.	The pupil <u>walking</u> next to me looked really tired.
3	We visited the city <u>which was mentioned</u> in our travel guide.	We visited the city <u>mentioned</u> in our travel guide.

Participle clauses instead of adverbial clauses:

Is she Russian??

Would you subscribe? ;)

While listening, write down the examples presented in the videos:

<https://www.youtube.com/watch?v=egaz3gMOsMc> (watch the first 1:08 min*)

Example for alternative of “when”:

Joe hurt his knee playing tennis

<https://www.youtube.com/watch?v=eWvkSp16VFY&t=32s> (start at 08:29 min)

Example for alternative of “if”:

Given

Example for alternative of “because” or “as”:

Realizing

2 more examples for alternatives of “when”:

While On

In case the link doesn't work, search for “Lernvideo: Participle constructions instead of adverbial and main clauses” von Sofatutor.
